

Rajesh M Mysoremath UX Designer | Embitel Technologies | Bengaluru

rajeshmm5321@gmail.com | +91 8431157174 | <https://portfolio-2-5-two.vercel.app>

Working remotely (WFH) from Davangere | <https://linkedin.com/in/rajeshmmysoremath>

PROFILE

User Experience Designer with 2 years of industry experience designing digital products for enterprise and retail domains at Embitel Technologies. I specialize in transforming complex workflows into simple, scalable, and accessible experiences. My design approach focuses on system thinking, user research, rapid prototyping, and cross-functional collaboration with engineering and product teams. I deliver high-quality design outcomes backed by data, usability insights, and clear documentation.

SKILLS & TOOLS

UX Design

User Research, Interaction Design, Wireframing, Prototyping, Usability Testing, Information Architecture

Tools

Figma, FigJam, Jira

Development

HTML, CSS, JavaScript

Design Principles

Design Systems, Component Libraries, Responsive Design, Accessibility (WCAG), Visual Design, Journey Mapping, Design Thinking

Collaboration

Agile, Cross-Functional Teamwork, Developer Handoff

PROFESSIONAL EXPERIENCE

UX Designer, Embitel Technologies

01.2025 – present | Bengaluru, India

- Designed end-to-end UX for enterprise and e-commerce platforms, impacting key areas like onboarding, information flows, and task efficiency.
- Led the UX revamp of a Student Information System, simplifying navigation and reducing task completion time by 40% through clearer architecture and visual hierarchy.
- Created interactive, development-ready Figma prototypes and collaborated with engineering teams to ensure pixel-accurate implementation.
- Conducted usability evaluations, synthesized feedback, and iterated designs to improve clarity, discoverability, and error-handling.
- Built reusable Figma components and documentation, improving design consistency and reducing handoff time.

UI/UX Intern, Embitel Technologies

06.2024 – 01.2025 | Bengaluru, India

- Contributed to the redesign of internal enterprise tools and a multi-store loyalty management platform, improving workflow efficiency and user error reduction.
- Conducted user interviews, survey analysis, and heuristic evaluations to identify usability gaps and improvement areas.
- Produced wireframes, task flows, and prototypes that accelerated client reviews and reduced design iteration cycles.
- Partnered with frontend developers and QA teams to maintain design quality and resolve usability defects before release.

PROJECTS

Enterprise Operations Dashboard

- Designed a modular dashboard with cards, tables, and filters to simplify high-volume review tasks.
- Built a structured Figma component library that improved design consistency and developer velocity.
- Improved task clarity using hierarchy, micro-interactions, and better grouping of information.

Customer Engagement Platform

- Redesigned loyalty enrollment and account flows, reducing steps and improving completion rates.
- Created scalable UI patterns (cards, forms, badges) used across multiple product modules.
- Improved usability through clearer grouping, improved content hierarchy, and better feedback states.

AI-Powered Support Assistant

- Designed a conversational UI for an AI-driven support assistant used by internal teams and end users.
- Structured message types, quick replies, and guided workflows to reduce user friction during task resolution.
- Applied usability best practices for readability, tone, and error handling in dynamic chat environments.
- Partnered with engineering teams to refine the interaction logic and ensure smooth handoff between AI and human support.

EDUCATION

B.Tech (Computer Science and Engineering), PES University

2020 – 2024 | Bengaluru

CERTIFICATES

AWS Cloud 101 (AWS, 2023) | Web Development Bootcamp (Udemy, 2023)

LANGUAGES

English | Kannada | Hindi
